Skills

Mobile applications testing (Android/iOS)

Testing Types
- Manual Testing
- Functional Testing
- Regression Testing
- Re-testing (Confirmation Testing)
- Exploratory Testing
- Negative Testing
- Compatibility Testing
- Installation and Update Testing
- API and Database Testing
- Performance and Stability Testing

QA Documentation
Test Plans, Test Cases, Test Suites, Bug Reports, Master Test Plan

Automation Testing: Beginner with Practical Experience
- Developed basic automated tests for an Android mobile application using Kotlin.
- Created and adapted pytest-based automated tests for embedded systems CLI command testing, following existing examples and test patterns.

WEB testing

Test Design Techniques
- Boundary Value Analysis
- Equivalence Partitioning
- State Transition Testing
- Input Validation Testing
- Error Handling Testing

Python: Basic level
- Basic understanding of Python fundamentals, including variables, data types, conditional statements, loops, and functions.
- Basic understanding of object-oriented programming (OOP) concepts, including classes, objects, inheritance, and encapsulation.
- Familiar with the basics of Python test automation using pytest.

Embedded testing
Basic knowledge of embedded systems testing, including CLI testing, communication protocols, and hardware simulation.
- CLI Command Testing
- Communication Protocol Testing (UART, I²C, SPI)
- Hardware-Software Integration Testing
- State Transition and Reset Testing
- Buffer Capacity and Message Handling Testing
- Memory Usage and Long-Run Stability Testing
- Fault Recovery Testing (WDT, power loss, I2C NACK, network disconnection)
- Embedded firmware testing in Wokwi
- BVA/negative/state-sequence testing
- Protocol analysis in PulseView
- Python / pytest automated testing.

Work Experience

Cadence Development, Mobile Manual QA Engineer 02/2021
present time

Language knowledge

Ukrainian — Native/Bilingual

English — Basic

Education

Psychology, Bachelor, Khmelnytsky National University 2015 – 2019
Khmelnytsky

Courses & Certifications

QATestLab certification , QATestLab 04/11/2020

PCAP: Programming Essentials in Python , Cisco Networking Academy 02/07/2021

Software Testing Diploma , STEP IT Academy 17/10/2021

Google AI Essentials , Google 19/05/2026

Google Prompting Essentials , Google 30/05/2026

Базова фізика для технологічних систем , Prometheus 06/08/2026

Інженерний курс «Народний FPV» , Vyriy, Victory Drones, Prometheus 28/08/2026

Інженер БПЛА. Базовий курс , Prometheus 01/09/2026

Embedded QA в IoT та DefTech , Prometheus 29/10/2026

Portfolio

Embedded Testing , Embedded QA Portfolio (GitHub)

- Seven hands-on embedded firmware testing projects (ESP32, Arduino Uno) in the Wokwi simulator
- covering GPIO and debounce
- UART CLI, I2C (PulseView analysis)
- fault injection and recovery (WDT, power loss, sleep)
- IoT networking and memory
- Python / pytest automated testing.
- Documented 27 defects (8 Critical) and created a Master Test Plan covering risks, exit criteria, and a release recommendation.
